PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building enterprise and consumer-facing applications using React, Next.js, Angular, and Flutter. Skilled in TypeScript and JavaScript, with a strong command of REST API integration, component-based architecture, and modern, responsive UI/UX. Actively developing AI-powered application features, including AI-based data extraction and automated insight generation for real-world workflows. Known for collaborating effectively across cross-functional teams to deliver scalable, production-ready software in agile environments.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Dart

Frontend: React.js, Next.js, Angular, HTML, CSS, Tailwind CSS

Backend: Node.js, REST API Design & Integration

Mobile: Flutter, Dart, Material Design

Databases: PostgreSQL, pgAdmin

Developer Tools: npm, Figma, Whimsical, GSAP, Postman, Azure Boards

Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Jr. Consultant, WonderBotz - Ahmedabad

Nov 2025 - Present

- Engineer reusable, component-based UI modules for internal enterprise applications, improving consistency and maintainability across the frontend codebase.
- Architect responsive, accessible interfaces and integrate REST APIs to connect frontend features with backend services.
- Partner directly with backend engineers and designers to translate enterprise requirements into scalable, production-ready frontend solutions.
- Drive UI/UX improvements and performance optimizations within an agile workflow, shipping features through sprint planning, development, and code review.

Full Stack Developer, Twins Apparels - Bhilwara

Aug 2024 - Oct 2025

- Engineered a fully responsive textile factory website using Next.js and Tailwind CSS.
- Implemented GSAP scroll-triggered animations to create a modern, engaging user experience across the site.
- Deployed the application on a custom domain, optimizing for performance and accessibility.

PROJECTS

InspecTech - AI-Powered Field Inspection Application (Great American Group)

Mar 2026 - Present

Tablet-based inspection application streamlining field data workflows with AI-assisted analysis.

- Architect a tablet-based UI using Flutter, Dart, and Material Design to support field inspection workflows for the Great American Group.
- Explore AI-based data extraction from inspection media to generate automated insights that speed up field decision-making.
- Develop responsive, component-driven layouts optimized for tablet use in real-world field conditions.

EVAL NextGen - Auction Monitoring Web Application (Great American Group)

Nov 2025 - Mar 2026

Enterprise dashboard delivering real-time auction data visualization and monitoring.

- Engineered the complete dashboard UI for an auction-monitoring platform using Angular, TypeScript, and Tailwind CSS.
- Integrated RESTful APIs to power real-time auction data visualization and monitoring.
- Optimized frontend performance and architected reusable components for a scalable enterprise user experience.

Personal Portfolio

[Live](#) | [Source Code](#)

Personal branding site showcasing full-stack projects and technical range.

- Built and deployed a personal portfolio using Next.js and Tailwind CSS, focused on performance and responsive design.
- Showcased real-world projects with detailed tech stacks, GitHub integration, and live previews.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering

2024

Chandigarh University - Mohali, Punjab | CGPA: 8.11

ACHIEVEMENTS

- Earned a Letter of Recommendation from Professor Saikat Samantha, recognized as a Senior Software Developer.
- Recognized with an Award of Excellence in the AMCAT examination for logical and quantitative ability (4th semester).
- Solved 340+ data structures and algorithms problems on LeetCode using Java.

CERTIFICATIONS

- Full Stack Web Development - UpSkillz
- Java Programming: Solving Problems with Software - Duke University (Coursera)
- Software Testing - NPTEL
